

SR2000[®] Advanced SMARTSCSR[™]

Featuring VitalCheck[®] Electronic Monitoring System (EMS)

SMARTSCSR[™] with VitalCheck[®]

A CSE SMARTSCSR[™] that contains VitalCheck[®] electronics, such as the SR2000[®], allows for continuous monitoring of the health of the unit. A simple blinking LED light serves as a quick, easy, and complete inspection of the unit. With its built-in radio, it is also able to transmit its status to a VitalScan[™]-equipped device.

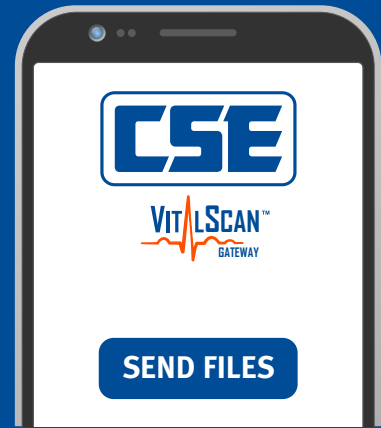

VitalScan[™] Gateway

Built on the same platform as VitalCheck[®], the VitalScan[™] Gateway is able to communicate with nearby units (such as an entire cache) to extract SCSR health status data. This data is saved onboard and ready to transfer to the CSE App in just a few seconds. In addition, an integrated LED alerts the user of the overall status of a cache.

CSE App

By using the CSE App, a user can quickly and wirelessly transfer inspection records from a VitalScan[™] Gateway to a mobile device. With a simple press of a button, these records can be transmitted to the VitalCloud[™] Portal for management and compliance reporting.

Direct link between VitalScan[™] Gateway and VitalCloud[™] Portal utilizing existing mine-wide networks coming soon!

VitalCloud[™] Portal

Managing SCSRs becomes easy with VitalCloud[™] Portal. An intuitive online dashboard provides a snapshot of your units' status, and detailed cache and unit data is available when more detail is desired. At the click of a button, a report can be generated and exported for recordkeeping and MSHA submission.

SCSR Program Considerations

Direct Inspection Cost

- Travel to/from SCSR location
- Open storage boxes
- Find correct unit(s)
- Hands-on inspection
- Manual recordkeeping

Indirect Inspection Cost

- Inspection accuracy
- Transcribe data
- Manage inventory
- Generate reports
- Search for units

Risk

- Safety/loss of life
- MSHA inspection/fines
- Insurance premiums
- Training effectiveness
- Human error

VitalCheck[®] EMS can reduce the financial burden of your SCSR program and help to mitigate risk!

Existing SCSR Inspection and Maintenance

-  Objective, one step inspection
-  Wireless inspection capable
-  Electronic recordkeeping
-  Online inventory management
-  MSHA report generation
-  Real-time alerts
